DATE:

PUBLIC CLOUD CREATING AN INSTANCE IN SALESFORCE

AIM:

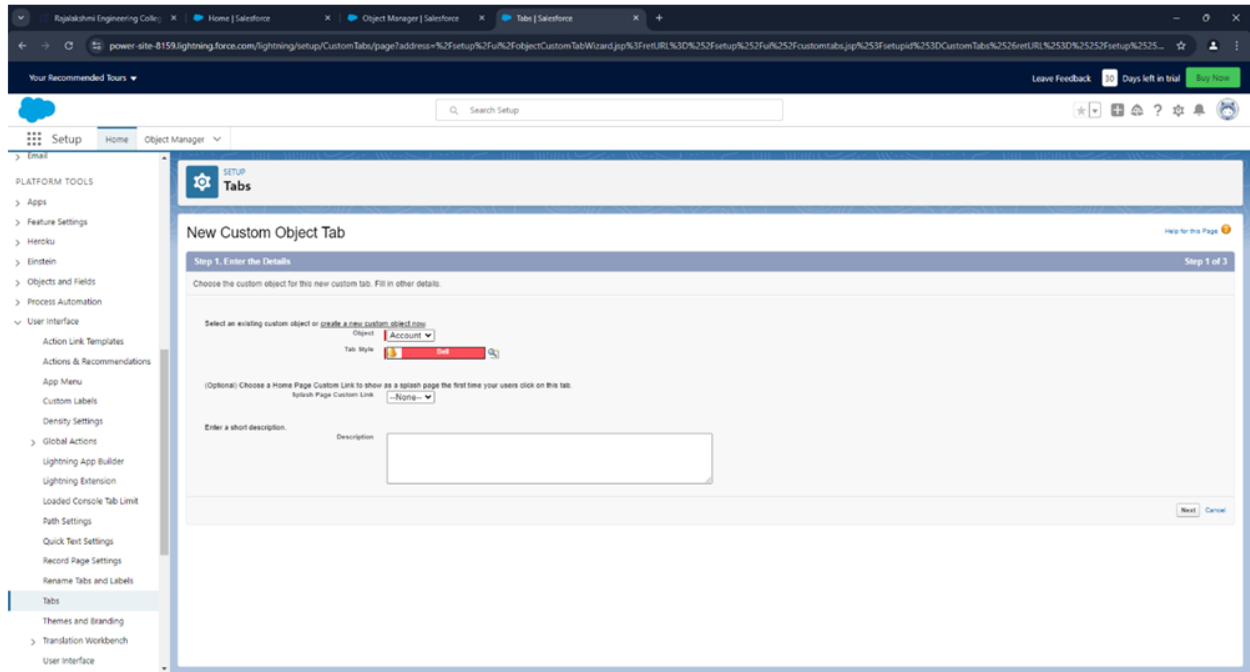

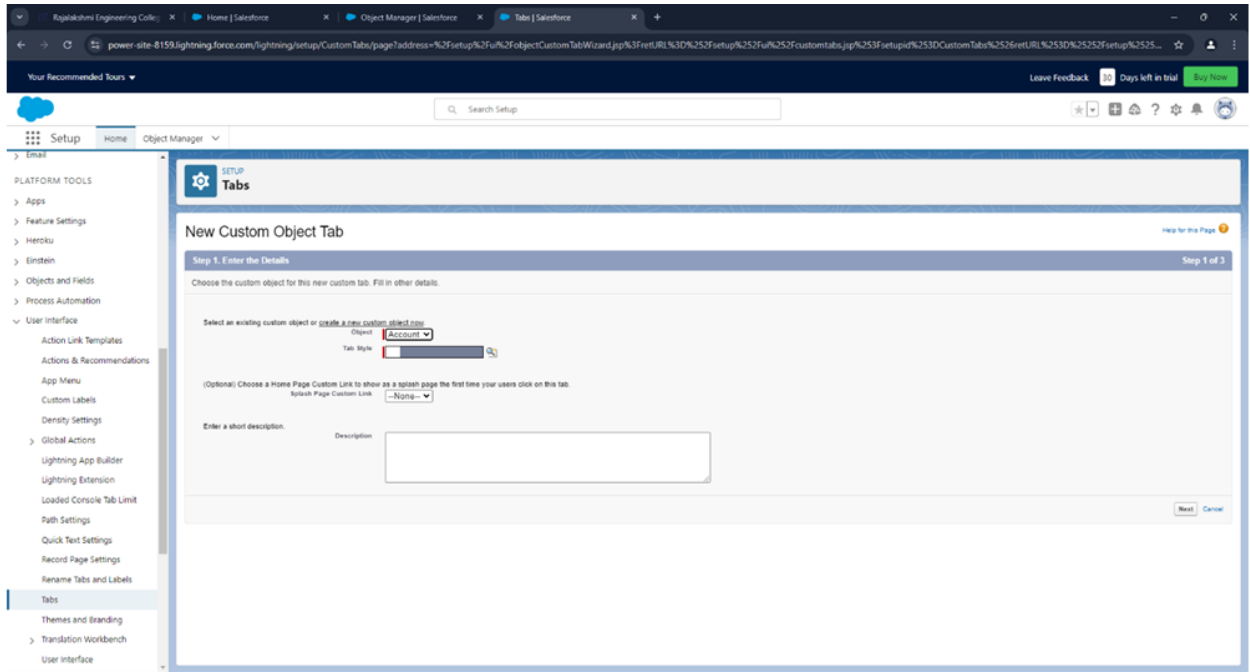

Develop a simple application to understand the concept of PAAS using Sales force

PROCEDURE:

- 1.Log in to your Salesforce account.
- 2.Click Setup at the upper-right corner.
- 3.Under the Build section, click Create and select Objects.
- 4.To create a custom object, click New Custom Object.
- 5.Enter the name of the Custom Object in Label, Plural Label, and Object Name.
- 6.Choose the custom apps for which the new Custom tab is required and click Save.
- 7.Select whether you want to define a custom app or a Salesforce console.
- 8.Give the app a name and description. An app name can have a maximum of 40 characters, including spaces. Click Save.

OUTPUT:

The screenshot displays the 'New Custom Object' configuration page in Salesforce. The browser address bar shows the URL: power-site-8159.lightning.force.com/lightning/setup/ObjectManager/new. The page header includes navigation links for Setup, Home, and Object Manager. The main content area is titled 'New Custom Object' and contains a 'Custom Object Definition Edit' section. This section includes a 'Custom Object Information' subsection with fields for Label (Account), Plural Label (Accounts), Object Name (Account), and a Description field. Below this is the 'Enter Record Name Label and Format' section, which includes a 'Record Name' field (Account Name) and a 'Data Type' dropdown set to 'Text'. At the bottom, the 'Optional Features' section has checkboxes for 'Allow Reports' and 'Allow Activities'. A yellow warning banner at the top of the form states: 'Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Set permissions] [Get help about this message again]'.

Setup

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.
